## FOR IMMEDIATE RELEASE

### Case Farms Bolsters Commitment to Worker Safety by Leveraging ProcessMAP

*ProcessMAP's cloud-based safety management software equips leading poultry producer to protect workers on the job across 17 locations nationwide*

**TROUTMAN, N.C. – March 13, 2017** – [ProcessMAP Corporation](#), a leading provider of enterprise cloud software platform for [Risk and Environmental, Health and Safety \(EHS\) management](#), announced that [Case Farms](#), a vertically integrated poultry farming and processing group and one of the nation's leading poultry producers, is adopting its software to protect workers on the job.

The meat and poultry industry is responsible for approximately six percent of our GDP, directly employs nearly two million people, and is indirectly responsible for about five million jobs. Workers in the industry face numerous health and safety risks that are inherent to the job

Like other progressive companies in the pursuit of safety excellence, Case Farms is adopting ProcessMAP's [integrated health and safety software](#) to:

- Provide employees with the safest workplace possible
- Centralize and automate safety management processes across the organization
- Mitigate recordable incidents and control risk by harnessing the power of big data to track, trend, and correlate workplace safety data – enabling smarter decisions
- Ensure compliance with OSHA's workplace safety standards
- Decrease lag time and manage safety on-the-go with an online/offline mobile platform
- Get actionable insights to reduce workers' compensation costs through seamless data exchange with Third Party Administrators

“With facilities nationwide, operationalizing our commitment to worker health and safety across the company using manual, paper-based processes was virtually impossible. Adopting ProcessMAP equips Case Farms to proactively improve safety management procedures, ensure compliance, and elevate our safety program to excellence,” said Rick Barton, director of safety at Case Farms. “The leadership team and I are excited about the insights we’ll garner from ProcessMAP’s analytics, empowering us to make informed decisions to mitigate safety risk.”

“We applaud Case Farm’s commitment to employee health and safety,” said Jagan Garimella, chief technology officer at ProcessMAP. “With ProcessMAP’s EDGE Solution, designed specifically for growing businesses, Case Farms is positioning itself to yield quick health and safety wins by rapidly deploying an out-of-the-box solution with embedded best practices.

### **About ProcessMAP Corporation**

ProcessMAP Corporation is the leading provider of cloud-based enterprise software solutions that empower organizations to manage risk in three key areas: Employee Health & Safety; Environment & Sustainability; and Enterprise Compliance. The company is headquartered in Sunrise, Fla., with locations across the globe, serving customers in over 125 countries. For more information, visit [ProcessMAP.com](http://ProcessMAP.com).

### **About Case Farms:**

Founded in 1986, Case Farms is a fully integrated poultry farming and processing group of dedicated individuals that work together to produce consistent, quality poultry products. Its driving purpose is to deliver superior products and service to every customer, every time. Case Farms processes 2.9 million birds per week, has over 3,200 dedicated team members, and produces in excess of 900 million pounds of fresh, partially cooked, and frozen-for-export poultry products per year. The company has operations or offices Ohio and North Carolina.
